Special Sessions Call for Papers **The Fifth International Symposium on Computer, Consumer and Control, 2020**

Session organizer : Prof. Mei Wang

Institution : Xi'an University of Science and Technology

E-mail : wangm@xust.edu.cn

Session title: *Brain Intelligence Control, Artificial Intelligence,*

Electrical Engineering

With the rapid progress of information science, the brain intelligence control, artificial intelligence, electrical engineering are becoming more and more strong where every device and person can be used as a component to probe states of human and machine and environment. They aim to enhance the states of human and machine and environment smartly through a recurrent process of sensing, mining, understanding, improving and control. They fill a gap between the mathematical theory and consumers. Prospective authors are invited to submit original papers to the Special Session.

Topics/Areas

We invite academic researchers and industry professionals from a broad range of disciplines to submit to this special issue. Topics of interest include, but are not limited to:

- Brain Intelligence Control
- Sensors and Semiconductor
- Intelligent Robot
- Electrical Engineering
- Networked Control
- Information Processing

All papers accepted and registered for presentation will be published in the conference proceedings, and excellent papers will be recommended for publication in

the special issue of SCI(E)/ EI journals. Please note that papers must submit via the submission system website and meet the format of IS3C2020.
