

**International Symposium on
Computer, Consumer and Control, 2020
November 13-16 2020, Taichung, Taiwan**
<http://is3c2020.ncuteecs.org>

**Special Sessions Call for Papers
The Fifth International Symposium on Computer, Consumer
and Control, 2020**

Session organizer : Prof. Shun-Yuan Wang, Prof. Sung-Jung Hsiao, Prof. Jen-Hsiang Chou

Institution : Department of Electrical Engineering, National Taipei University of Technology

E-mail : topdike@gmail.com

Session title: *IoT Sensing and Artificial Intelligence*

At present, chip technology is becoming more and more advanced, and many sensing network technologies are also developing towards artificial intelligence technology, while also dealing with more complex issues. Driven by this motivation, various sensing systems have added many innovative methods to the calculation of data transmission. In addition, in various wireless sensing network architectures, how to carry out a humanized AI algorithm is an extremely interesting topic. Especially in any environment, the two-way control of the human-machine interface is an extremely important issue. We sincerely invite potential authors to submit original papers to the special meeting.

Topics/Areas

We sincerely invite academic researchers and industry professionals from a broad range of disciplines to submit to this special issue. The paper research topics include but are not limited to:

- Edge computing and Cloud computing
- Wireless sensor networks
- Machine learning and Deep learning
- Blockchain and Big data analysis
- Security and privacy for smart IoT

All papers accepted and registered for presentation will be published in the conference proceedings, and excellent papers will be recommended for publication in the special issue of SCI(E)/ EI journals. Please note that papers must submit via the submission system website and meet the format of IS3C2020.
