Special Sessions Call for Papers **The Fifth International Symposium on Computer, Consumer and Control, 2020**

Session organizer : Prof. Chuin-Mu Wang, Ruey-Maw Chen, and Chen-Kun
Tsung

Institution : National Chin-Yi University of Technology

E-mail : ckt@ncut.edu.tw

Session title: *Informatic System Design and Implementation*

With the advancement of communication and computation power, the gap between cyber systems and physical systems becomes more and more small. It means people not only have more convenient life but also have better experience. The improvement comes from the informatic system design and implementation. The processes of informatic systems cover the information collection, information storage, data analysis, data visualization, data communication, etc. In addition, informatic systems provide the solution for real-world problems such as the event prediction, pattern recognition, and optimal decision making.

This session aims at providing an overview of design and implementation for informatic systems. Prospective authors are invited to submit original papers to the Special Session.

Topics/Areas

We invite academic researchers and industry professionals from a broad range of disciplines to submit to this special issue. Topics of interest include, but are not limited to:

- Informatic Algorithm Design and Implementation
- Informatic Web Service Design and Implementation
- Informatic Secure Communication Design and Implementation
- Informatic Data Manipulation Design and Implementation
- Other Informatic Application Design and Implementation

All papers accepted and registered for presentation will be published in the conference proceedings, and excellent papers will be recommended for publication in

the special issue of SCI(E)/ EI journals. Please note that papers must submit via the submission system website and meet the format of IS3C2020.
