Special Sessions Call for Papers **The Fifth International Symposium on Computer, Consumer and Control, 2020**

Session organizer : A.Prof. Kuo-Hsien Hsia

Institution : National Yunlin University of Science and Technology

E-mail : khhsia@yuntech.edu.tw

Session title: *Intelligent Systems and Control*

With the evolution of information and network technology, it has become an inevitable trend to give appropriate wisdom to systems. Just like automatic bread makers, sweeping robots, parking assist robots, etc., many smart appliances are constantly being introduced to improve human lives. When human beings have what kind of demand, the development of technology will gradually fulfill our dreams. In short, almost all life-related mechanical systems and home appliance systems are inseparable from control, and the computer's computing power and proper sensing and communication give these systems considerable wisdom and make them smarter. In this session, papers about intelligent systems and control will be presented. Prospective researchers are welcomed to communicate to others in this session.

Topics/Areas

We invite academic researchers and industry professionals from a broad range of disciplines to submit to this special issue. Topics of interest include, but are not limited to:

- Intelligent Control Systems
- Artificial Internet of Things
- Artificial Life and Systems
- Mobile Robotics
- Other System and Control Applications

All papers accepted and registered for presentation will be published in the conference proceedings, and excellent papers will be recommended for publication in the special issue of SCI(E)/ EI journals. Please note that papers must submit via the submission system website and meet the format of IS3C2020.
